

The 7th East Asia Number Theory Conference

On depth 2 zeta-like families

Dr. Yen-Liang Kuan

2018 - 02 - 08 (Thu.)

16:20 - 17:10

101, Mathematics Research Center Building (ori. New Math. Bldg.)

Multizeta values for $F_q[\theta]$ were initially studied by Thakur, who defined them as analogues of classical multiple zeta values of Euler. In this talk, we will give certain depth 2 families of zeta-like multizeta values, namely those whose ratio to the zeta value of the same weight is rational. This is a joint work with Huei-Jeng Chen.
